Abstract not available for DE20201658U

Abstract of corresponding document: **EP1332688**

The helmet (100) has an outer shell (101) made of shock-absorbing material. It has bars or ribs with ventilation openings (107) between them. A transparent visor (106) is fitted in front and there is a chinstrap (105). Fasteners (103) hold side pieces (102) which may be perforated (104) for ventilation.
